

## PRODUCT DATASHEET

### E1S multiple letterboxes for flats

These internal wall mounted multiple letterboxes, can be manufactured in banks of 3, 4, 5, 6.

The bottom of this letterbox is slightly slanted in order to accommodate A4 correspondence. Each individual letterbox is positioned under the angle. Thanks to this the depth of this letterbox is only 217 mm (comparing to 270 mm for E1 letterbox) which makes it ideal for the corridors where space is limited.

Due to the design style, these internal wall mounted communal letter boxes cannot be stacked above each other; but can be positioned next to each other, subject to available wall space

Wall Mounted Internal
